

ECONOMIC INDICATORS FOR LONGMONT

Through January 2024

Prepared by the CITY OF LONGMONT FINANCE DEPARTMENT

SUMMARY

This report includes data that is tracked on a regular basis to monitor the financial outlook for the City of Longmont. Each of these indicators may have some bearing on the revenues for the City. This report is for the month of January 2024. The report includes historical data to which the current data can be compared. Throughout the year we monitor the indicators to compare to budgeted projections and to determine if the local economic condition has improved compared to previous years. It also helps us make annual revenue projections for our budget.

Each year our most important revenue indicator is our sales and use tax revenue collections. It is the largest source of revenue for five primary funds of the City. When sales and use taxes are doing well it typically is reflective of a strong local economy. On the other hand, when either sales tax or use tax is down or not meeting growth projections it can put a strain on City budgets, particularly in those five primary funds: the General Fund, the Public Improvement Fund, the Street Fund, the Open Space Sales Tax Fund, and the Public Safety Sales Tax Fund.

The City sales and use tax rate is currently 3.53%. Of that amount, 1.53% is earmarked by voter direction as follows: 0.75% to the Street Fund, 0.20% to the Open Space Fund, and 0.58% to the Public Safety Fund. The remaining non-earmarked 2.0% is allocated by the City Council through a financial policy. The current financial policy allocates the 2.0% sales and use tax in a split of 85% General Fund and 15% Public Improvement Fund.

The performance of the sales and use tax in 2022 was 9.4% above 2021 levels. This followed overall growth of 12.4% in 2021; 4.62% in 2020; 1.65% in 2019; 11.45% in 2018, 10.06% in 2017, 6.74% in 2016, 3.0% in 2015, 7.5% in 2014, 6.1% in 2013, 4.5% in 2012 and 5.9% in 2011. The sales tax for 2022 finished the full year 8.0% above 2021 while the use tax revenue was 16.9% more than in 2021. It is important to note that there was a tax rate increase of 7.79% in 2018, which influenced the overall results for that year.

For 2023 our budgeted sales and use tax collections are 1.71% greater than the actual collections for 2022. Our original budgeted projection for 2023 was an overall 3.69% increase, but it was predicated on a 7.28% increase in 2022 collections. The actual increase of 9.4% in 2022 left us needing growth of 1.71% in overall collections to meet the 2023 budget.

December transactions were received by the City in January. Through December 2023, our sales and use tax revenue increased 4.2% compared to collections through December 2022. While the sales tax increased 6.6%, the use tax decreased 8.4%. Use tax performance was driven by three major areas: primary employers (37.3% decrease), lumber (4.8% decrease), and auto sales outside the city (5.1% increase).

Building permit activity is the other indicator that has a significant effect on revenues in the General Fund as well as in some other funds that rely on community investment fees as a funding source. A history of that activity follows. After very limited building activity from 2008 through 2011, the subsequent years showed progressive growth that peaked in 2018.
