

INTRODUCTION

What is an Enhanced Multi-Use Corridor?

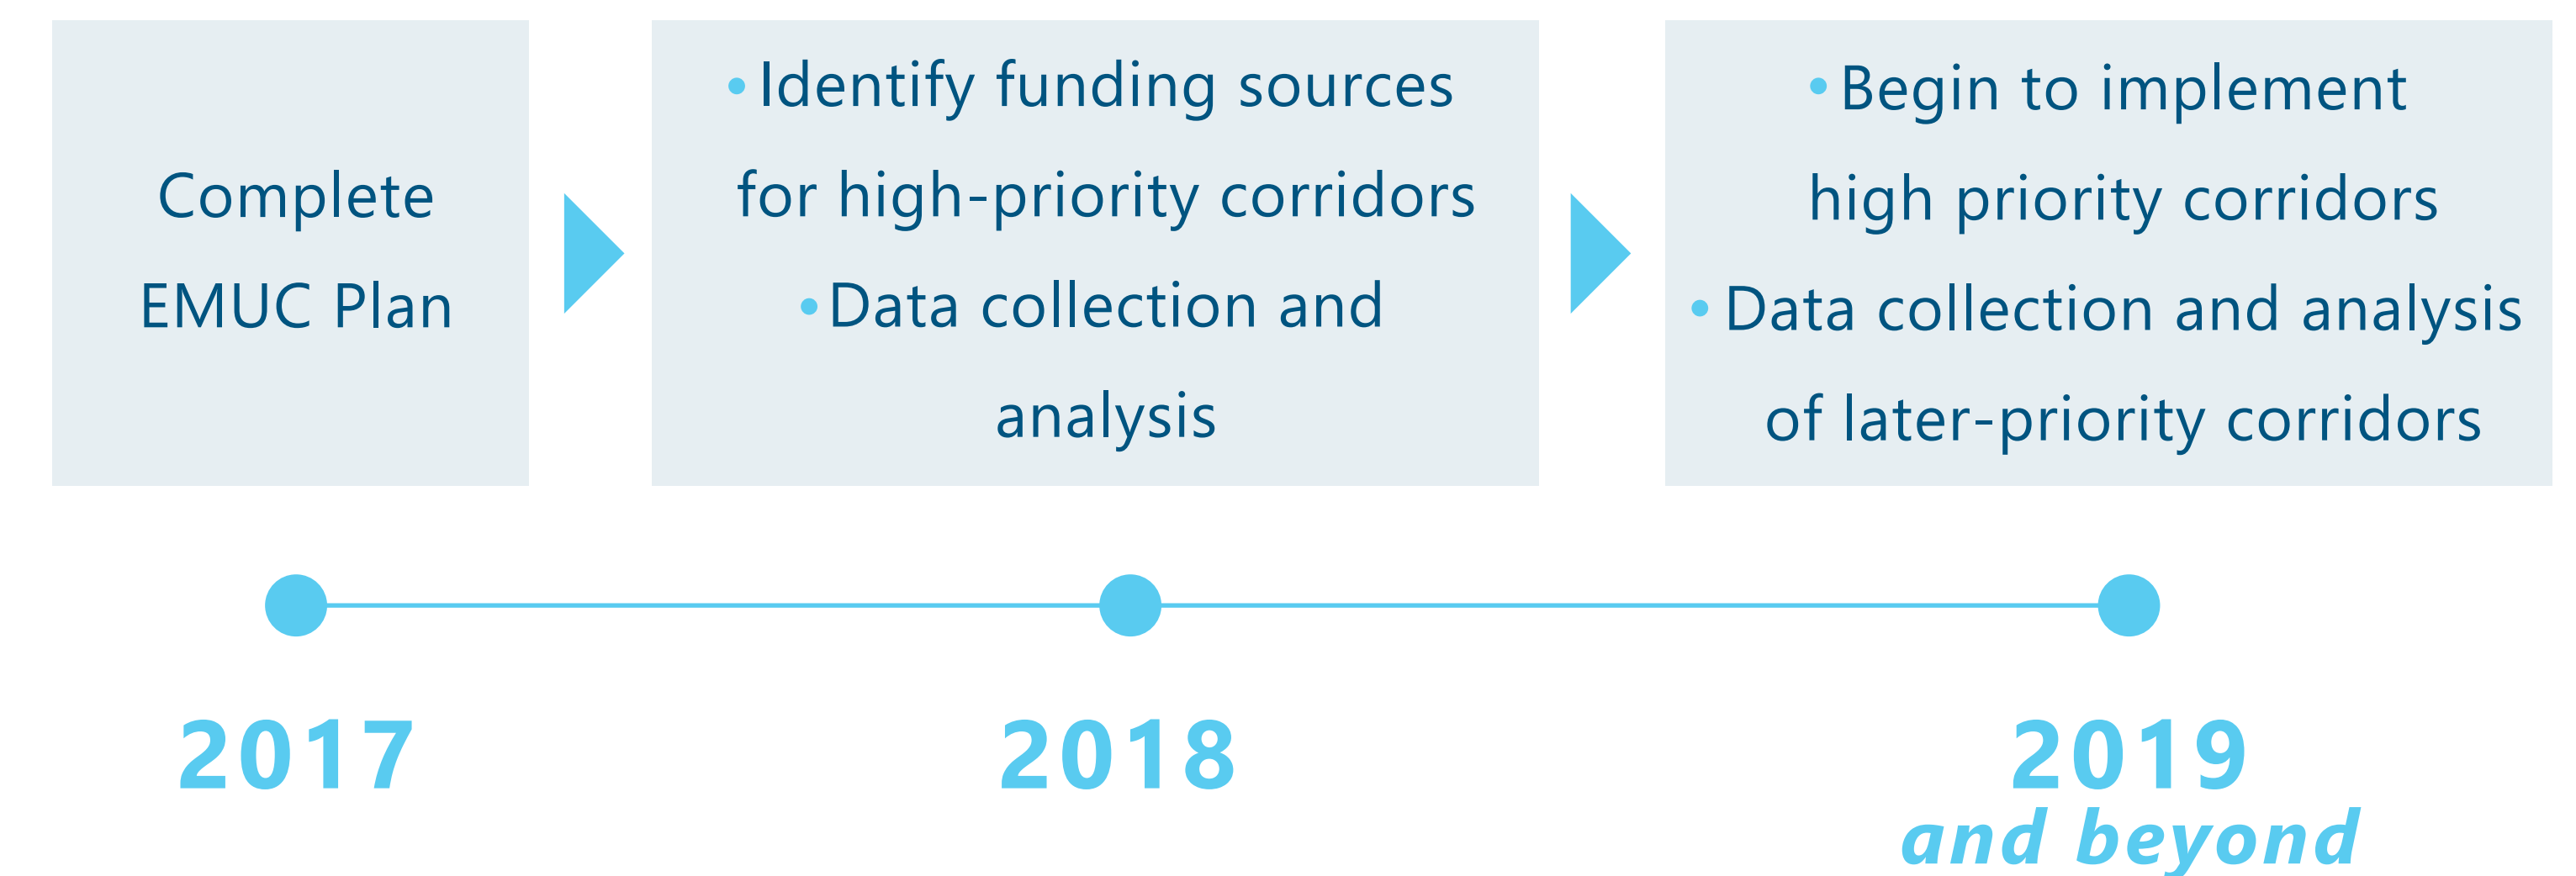

Enhanced Multi-Use Corridors (EMUC) are street corridors that provide safe, comfortable, low-stress bicycle and pedestrian facilities, much like a multi-use trails, to provide connectivity within the City's trail system and multi-modal transportation network.

These facilities can look different depending on the characteristics of the street and the right-of way available.

Typical Facility Types

- Sidewalks or shared-use sidewalks
- Bicycle facility
 - Shared lanes
 - Bike lanes
 - Buffered or protected bike lanes

Schedule

Next Steps

Additional elements that will take place before EMUCs are implemented:

- Parking utilization studies
- Traffic counts
- Intersection approach treatments
- Final designs
