

# ST. VRAIN GREENWAY TRAIL DETOUR

Longmont's St. Vrain Greenway and accompanying trail network is being repaired and restored as part of the Resilient St. Vrain Project. This work requires closing less than 0.5 mile of the trail between Izaak Walton Nature Area and Price Road while making improvements to the St. Vrain Creek including replacement of the Boston Avenue Bridge.

- An approximately 1.1 mile, on-street detour around this construction area has been developed and clearly marked with signs to safely route pedestrians and bicyclists around the work zone.
- This detour is anticipated to remain in place through Fall 2026.
